Quality Graduate Rotational Program

North America Quality Graduate Rotational Program is designed specifically for highly talented individuals who are looking for an accelerated career progression in Quality. This program develops world-class engineers through challenging assignments, high visibility, multi-divisional team projects, integrated training and development, and formal coaching and mentoring programs.

“One of the most beneficial aspects of the Quality Rotational Program was the site visits. I gained a deeper understanding about Stryker as a whole and specifically the Stryker Quality Systems. It was very encouraging to meet with so many welcoming, successful individuals and to see that every site and division leverages Stryker’s core mission and values to excel in quality and manufacturing.”

– Nikole Palmieri; 2017 Quality Graduate alum

“Having the opportunity to use the skills behind Kaizen, Lean Lighthouse, and Six Sigma projects at Mahwah and within Stryker was an extremely beneficial addition to my experience within the QRP program.”

– Victoria Janssen; 2017 Quality Graduate alum

Program overview

Two rotations

Mahwah, NJ | Salt Lake
City, UT

Duration

18 months

Events

Mako robot demo
Product showcases
Networking
Meet with senior leaders
